Sudhanraja S

+91 87543 30144 | sudhanraja003@gmail.com | linkedin.com/in/sudhanraja-s | github.com/Sudhanraja

Professional Summary

Software Engineer skilled in REST API development, full-stack web applications, and AI-powered systems using Java, Spring Boot, Python, FastAPI, and React.js. Experienced in backend architecture, SQL/PostgreSQL database design, and applying Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG) to production-grade problems. Ships scalable, maintainable software end-to-end and is expanding into AI engineering through hands-on projects. Seeking Software Engineer, Backend Engineer, or AI Engineer roles at product-driven technology companies.

Technical Skills

Languages: Java, Python, SQL, JavaScript, HTML/CSS
Backend & APIs: Spring Boot, FastAPI, REST API Development, Microservices, MVC, OOP
AI / Machine Learning: LLMs, Retrieval-Augmented Generation (RAG), LangChain, Google Gemini API, Prompt Engineering, Sentence Transformers, Vector Embeddings, Semantic Search
Frontend: React.js, Streamlit
Databases: PostgreSQL, ChromaDB, Database Design
Developer Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Eclipse, AI-Assisted Development (Claude AI)
Foundations: Data Structures, Algorithms, Problem Solving, Clean Code, Scalable Application Design

Professional Experience

Software Engineer Mar 2026 – Present
OASYS Cybernetics Pvt. Ltd. *Chennai, India*

- Developed end-to-end features for a production e-commerce platform, building responsive frontend interfaces and scalable REST APIs integrated with relational databases.
- Engineered and refined AI prompts for a customer-facing platform, improving response accuracy and consistency across automated content-generation workflows.
- Applied Claude AI throughout the development lifecycle to accelerate feature delivery, strengthen code quality, and streamline debugging and testing.

Process Associate Aug 2025 – Dec 2025
Capgemini *Trichy, India*

- Reviewed and validated health insurance claims against policy coverage and eligibility criteria, ensuring accuracy and regulatory compliance.
- Resolved processing discrepancies and maintained precise documentation, strengthening data integrity across claim records.

Projects

FinPilot AI | *React.js, FastAPI, PostgreSQL, Google Gemini API, LangChain* | repo June 2026 – July 2026

- Architected an AI-powered personal finance platform that helps users track expenses, manage budgets, and receive personalized financial recommendations.
- Integrated the Google Gemini API with LangChain to analyze spending patterns and generate context-aware budgeting and savings insights in real time.
- Built secure authentication, transaction management, and analytics dashboards through RESTful APIs developed with FastAPI and PostgreSQL.
- Designed a modular, scalable full-stack architecture with clear separation between frontend, backend, and AI service layers to support maintainability and future growth.

Employee Handbook RAG | *Python, Streamlit, ChromaDB, Sentence Transformers* | repo July 2026

- Built a Retrieval-Augmented Generation (RAG) chatbot that answers employee handbook queries using semantic search and grounded, AI-generated responses.
- Developed a document ingestion pipeline that extracts, chunks, and embeds PDF content into ChromaDB for efficient similarity retrieval.
- Reduced LLM hallucinations by grounding Gemini API responses in retrieved context, using Sentence Transformer embeddings for semantic accuracy.
- Delivered an interactive Streamlit interface enabling real-time, document-based question answering through an intuitive UI.

Education

K. Ramakrishnan College of Technology 2020 – 2024
Bachelor of Technology in Artificial Intelligence and Data Science *Samayapuram, Trichy*
