Experience

Software Engineer Mar 2026 – Present

OASYS Cybernetics Pvt. Ltd. *Chennai*

- Designed and optimized AI prompts to enhance customer interactions, improve response quality, and support content generation across business workflows.
- Developed end-to-end features for an e-commerce platform by implementing responsive frontend interfaces, scalable backend REST APIs, and database integration.
- Leveraged Claude AI for assisted software development, accelerating feature delivery, improving code quality, and streamlining debugging and development workflows.

Process Associate Aug 2025 – Dec 2025

Capgemini *Trichy*

- Processed and validated health insurance claims by verifying policy coverage, member eligibility, and supporting documentation for accuracy and compliance.
- Evaluated claims based on insurance guidelines to determine approval, denial, or modification while ensuring adherence to quality and regulatory standards.
- Maintained accurate claim records, resolved processing discrepancies, and completed case closures through timely documentation updates and stakeholder communication.

Projects

FinPilot AI June 2026 – July 2026

React.js, FastAPI, PostgreSQL, Gemini API, LangChain | GitHub

- Developed an AI-powered personal finance platform that enables users to manage expenses, budgets, and financial goals through intelligent recommendations and financial insights.
- Integrated Google Gemini API and LangChain to provide personalized financial assistance by analyzing spending patterns and generating AI-driven budgeting and savings suggestions.
- Built secure authentication, user onboarding, transaction management, analytics dashboards, and RESTful APIs using React.js, FastAPI, and PostgreSQL.
- Designed a scalable full-stack architecture with modular backend services, responsive frontend components, and efficient database integration.

Employee Handbook RAG July 2026

Python, Streamlit, ChromaDB, Sentence Transformers, Gemini API | GitHub

- Developed an end-to-end Retrieval-Augmented Generation (RAG) chatbot that answers employee handbook queries using semantic search and AI-generated responses from Google Gemini.
- Built a document ingestion pipeline to extract PDF text, perform chunking, generate vector embeddings, and store them in ChromaDB for efficient similarity retrieval.
- Implemented semantic retrieval using Sentence Transformers and integrated the Gemini API to generate context-aware, grounded answers while reducing LLM hallucinations.
- Designed an interactive Streamlit application with a modular Python architecture, enabling real-time document-based question answering through an intuitive user interface.

Technical Skills

Languages: Java, Python, SQL, JavaScript, HTML/CSS
Frameworks & Technologies: React.js, FastAPI, Streamlit, LangChain, REST APIs
AI & Machine Learning: Retrieval-Augmented Generation (RAG), Google Gemini API, Prompt Engineering, Sentence Transformers, Vector Embeddings, Semantic Search
Databases: PostgreSQL, ChromaDB
Developer Tools: Git, GitHub, VS Code, Postman, IntelliJ IDEA, Eclipse, Claude AI
Libraries: pandas, NumPy, pypdf, python-dotenv

Education

K. Ramakrishnan College of Technology Samayapuram, Trichy

Bachelor of Technology in Artificial Intelligence and Data Science *2020 – 2024*
